

Continuum of Learning Experiences Framework Overview

The kindergarten through grade eight Continuum of Learning Experiences Framework (COLEF) charts can be used to guide students through the research process to ensure depth and complexity of learning. Each framework chart provides grade level and beyond grade level English Language Arts and Reading TEKS for developing a research plan, conducting authentic research, and sharing findings. In addition the foundation curriculum TEKS of math, science, and social studies are included to provide guidance for utilizing and implementing discipline-appropriate inquiry methods. Each chart also references the six scoring dimensions from the Texas Performance Standards Project (TPSP) and the Texas College and Career Readiness Standards (CCRS). The framework charts are a resource for assisting teachers in developing a continuum of learning experiences that leads to the development of advanced-level products and/or performances resulting from in-depth research.

Research Process	English Language Arts and Reading TEKS (includes above grade level standards)	Texas Performance Standards Project Scoring Dimensions	Foundation Area TEKS (Math, Science, and Social Studies)	Texas College and Career Readiness Standards (CCRS)
<p>1. Develop Research Plan</p> <ul style="list-style-type: none"> Define problem or topic and research questions Review sources of information/data 	<p>Grade 6: (22) Research/Research Plan. Students ask open-ended research questions and develop a plan for answering them. Students are expected to:</p> <p>(A) brainstorm, consult with others, decide upon a topic, and formulate open-ended questions to address the major research topic; and</p> <p>(B) generate a research plan for gathering relevant information about the major research question.</p> <p>Grade 7: 22) Research/Research Plan. Students ask open-ended research questions and develop a plan for answering them. Students are expected to:</p> <p>(A) brainstorm, consult with others, decide upon a topic, and formulate a major research question to address the major research topic; and</p> <p>(B) apply steps for obtaining and evaluating information from a wide variety of sources and create a written plan after preliminary research in reference works and additional text searches.</p> <p>Grade 8: (22) Research/Research Plan. Students ask open-ended research questions and develop a plan for answering them.</p>	<p>1. Content Knowledge and Skills (CKS) are the key facts, concepts, principles, skills, themes, and methods of inquiry of a discipline. Through planned educational experiences, gifted and talented students begin to access advanced content and develop the skills necessary to manipulate content in sophisticated ways in a variety of contexts. The Texas Essential Knowledge and Skills (TEKS) are the core curriculum and as such serve as the basis of differentiation for students' levels of achievement and areas of giftedness.</p> <p>4. Research (R) is the inquiry process used in the discipline. Steps in the PSP research process include the following:</p> <ul style="list-style-type: none"> Defining the research problem Reviewing quality sources of information Refining the research question(s) Developing the research design Carrying out the research design Analyzing the results Reporting the findings through a product and/or presentation 	<p>Math:</p> <p>(1) Mathematical process standards. The student uses mathematical processes to acquire and demonstrate mathematical understanding. The student is expected to:</p> <p>(A) apply mathematics to problems arising in everyday life, society, and the workplace.</p> <p>Science:</p> <p>(2) Scientific investigation and reasoning. The student uses scientific inquiry methods during laboratory and field investigations. The student is expected to:</p> <p>(A) plan and implement comparative and descriptive investigations by making observations, asking well-defined questions, and using appropriate equipment and technology; [and]</p> <p>(B) design and implement experimental investigations by making observations, asking well-defined questions, formulating testable hypotheses, and using appropriate equipment and technology.</p> <p>Social Studies:</p> <p>(23) Social studies skills. The student uses problem-solving and decision-making skills, working independently</p>	<p>Cross-Disciplinary Standards:</p> <p>I.A.1. Engage in scholarly inquiry and dialog.</p> <p>I.C.1. Analyze a situation to identify a problem to be solved.</p> <p>I.D.1. Self-monitor learning needs and seek assistance when needed.</p> <p>I.D.2. Use study habits necessary to manage academic pursuits and requirements.</p> <p>I.E.1. Work independently.</p> <p>I.E.2. Work collaboratively.</p> <p>I.F.2. Evaluate sources for quality of content, validity, credibility, and relevance.</p> <p>II.C.1. Understand which topics or questions are to be investigated.</p> <p>II.C.2. Explore a research topic.</p> <p>II.C.3. Refine research topic based on preliminary research and devise a timeline for completing work.</p> <p>II.C.4. Evaluate the validity and reliability of sources.</p> <p>II.D.2. Use statistical and probabilistic skills necessary for planning an investigation and collecting, analyzing, and interpreting data.</p>

	<p>order to see the relationships between ideas, and convert graphic/visual data (e.g., charts, diagrams, timelines) into written notes;</p> <p>(D) identify the source of notes (e.g., author, title, page number) and record bibliographic information concerning those sources according to a standard format; and</p> <p>(E) differentiate between paraphrasing and plagiarism and identify the importance of citing valid and reliable sources.</p> <p>Grade 7: (23) Research/Gathering Sources. Students determine, locate, and explore the full range of relevant sources addressing a research question and systematically record the information they gather. Students are expected to:</p> <p>(A) follow the research plan to gather information from a range of relevant print and electronic sources using advanced search strategies;</p> <p>(B) categorize information thematically in order to see the larger constructs inherent in the information;</p> <p>(C) record bibliographic information (e.g., author, title, page number) for all notes and sources according to a standard format; and</p>	<p>study. Examples of skills that promote this dimension include identifying points of view, recognizing the values and beliefs that influence individuals' and groups' perspectives on issues, distinguishing between statements that can be proven and statements that reflect personal beliefs or judgments, and reevaluating personal viewpoints in relation to others.</p> <p>4. Research (R) is the inquiry process used in the discipline. Steps in the PSP research process include the following:</p> <ul style="list-style-type: none"> • Defining the research problem • Reviewing quality sources of information • Refining the research question(s) • Developing the research design • Carrying out the research design • Analyzing the results • Reporting the findings through a product and/or presentation 	<p>estimation, and number sense as appropriate, to solve problems.</p> <p>Science:</p> <p>(2) Scientific investigation and reasoning. The student uses scientific inquiry methods during laboratory and field investigations. The student is expected to:</p> <p>(C) collect and record data using the International Systems of Units (SI) and qualitative means such as labeled drawings, writing, graphic organizers.</p> <p>(3) Scientific investigation and reasoning. The student uses critical thinking, scientific reasoning, and problem solving to make informed decisions and knows the contributions of relevant scientists. The student is expected to:</p> <p>(D) relate the impact of research on scientific thought and society, including the history of science and contributions of scientists as related to the content.</p> <p>(4) Scientific investigation and reasoning. The student knows how to use a variety of tools and safety equipment to conduct science inquiry. The student is expected to:</p> <p>(A) use appropriate tools to collect, record, and analyze information,</p>	<p>codes of conduct.</p> <p>II.A.1. Use effective prereading strategies.</p> <p>II.A.2. Use a variety of strategies to understand the meanings of new words.</p> <p>II.A.3. Identify the intended purpose and audience of the text.</p> <p>II.A.4. Identify the key information and supporting details.</p> <p>II.A.5. Analyze textual information critically.</p> <p>II.A.6. Annotate, summarize, paraphrase, and outline texts when appropriate.</p> <p>II.A.7. Adapt reading strategies according to structure of texts.</p> <p>II.A.8. Connect reading to historical and current events and personal interest.</p> <p>II.E.1. Use technology to gather information.</p>
